

THE 20/20 WORKSHEET

Which of your ideas are worth a closer look?

List a handful of workflows or tools you're weighing up. Score each on the value it could bring to your organisation and the risk it opens up — gut feel, not analysis.

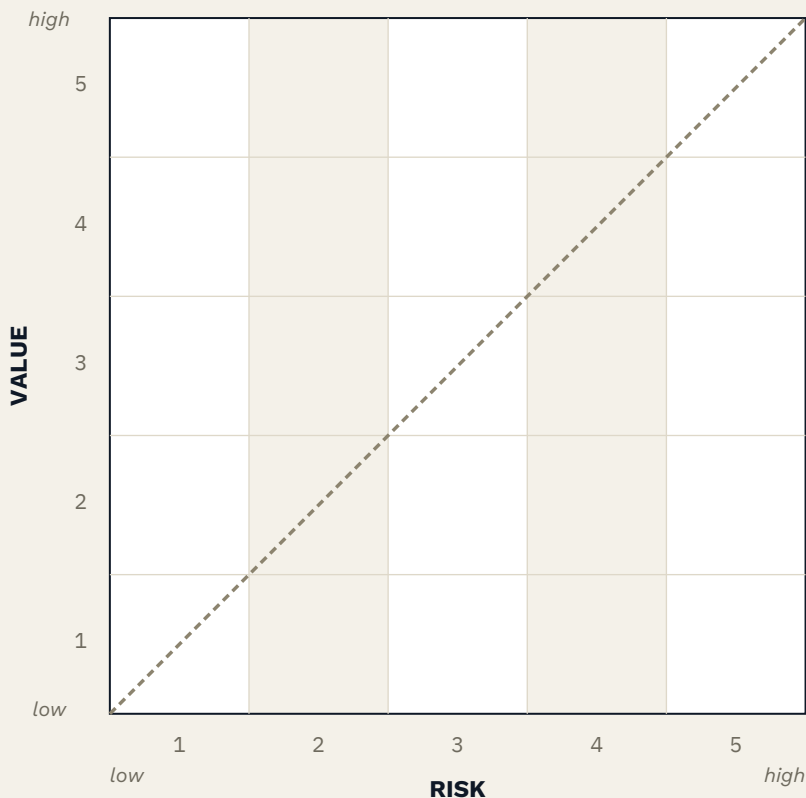

WORKFLOW OR TOOL	VALUE 1-5	RISK 1-5
01	1 2 3 4 5	1 2 3 4 5
02	1 2 3 4 5	1 2 3 4 5
03	1 2 3 4 5	1 2 3 4 5
04	1 2 3 4 5	1 2 3 4 5
05	1 2 3 4 5	1 2 3 4 5
06	1 2 3 4 5	1 2 3 4 5

Circle a number in each column. Relative to each other is what matters, not precision.

STEP 2 — PLOT EACH ONE

Find each score on the grid below and mark it with a dot.

If two land in the same spot, nudge one slightly within its square — there's room to spread out.

STEP 3 — READ THE RESULT

The dotted line marks where value and risk are equal.

Above the line: more value than risk. Worth a closer look.

Below it, or sitting right on it: probably not worth the effort yet — or a genuine judgement call.

Got two or three ideas sitting above the line?

That's the point where a gut check should turn into a proper decision — with the whole team's input, not just one person's guess. Better Vue turns this worksheet into a live queue your team can build on.
